

MALEEHA BILAL

Forward Deployed Engineer · Client-Facing Delivery & Automation

Islamabad, Pakistan · Open to relocation (UK / EU / Gulf) and fully remote roles · Requires visa sponsorship

maleehabilal.mb@gmail.com · +92 333 5158315 · github.com/Maleehabilalmb · linkedin.com/in/maleehabilalmb · mbdevstudio-omega.vercel.app

SUMMARY

Engineer who takes client problems from requirements through to production — scoping, building, deploying and supporting software in client-facing settings. Delivers across web, mobile and cloud automation in TypeScript and Python, using spec-driven development, written runbooks and agent tooling (MCP). Career changer with 15 years in education and finance, now building software full-time. MSc Economics & Finance, Distinction (CGPA 3.92/4.00).

TECHNICAL SKILLS

Languages TypeScript, JavaScript, Python

Frontend & Mobile React, Next.js (App Router), React Native, Expo (EAS), Tailwind CSS

Backend & Data Node.js, REST APIs, Firebase (Auth, Firestore), JSON Schema

Testing & QA Playwright, cross-browser and responsive regression testing

Cloud & DevOps Docker, Vercel, Oracle Cloud (ARM64), Linux, Tailscale, CI/CD, Git & GitHub

AI & Automation Model Context Protocol (MCP), agent orchestration, n8n

Delivery Practices Spec-driven development, requirements elicitation, stakeholder communication, runbooks and technical documentation

EXPERIENCE

MB Dev Studio — Founder & Developer Islamabad / Remote · May 2026 – Present [site](#) · [repo](#)

- Run client engagements end to end: requirements, scoping, build, deployment and post-launch support.
- Built and deployed a six-section consultancy site on Next.js App Router with TypeScript, Tailwind and Vercel — reusable component library, responsive layouts and programmatic SEO.

Cybersecurity Intern — Progree Virtual · Jun – Jul 2026

- Ran network reconnaissance and traffic analysis with nmap and Wireshark; produced STRIDE threat models and an incident-response plan mapped to NIST SP 800-61.

Economics & Business Teacher — Lahore School System Lahore · 2023 – 2026

- Designed curriculum and taught quantitative problem solving.

PROJECTS

OpenClaw Prep — Android exam-prep app React Native · Expo (EAS) · TypeScript · Firebase · Apr 2026

- Built a complete mobile product — Firebase Auth, Firestore sync, offline-first handling and in-app purchases. Release build in closed testing on Google Play Console; test access available on request.
- Implemented a runtime circuit breaker that degrades gracefully on backend failure, keeping the app usable during outages.

Self-Hosted Automation Platform Oracle Cloud ARM64 · Docker · n8n · Tailscale · Linux

- Deployed an n8n automation stack on ARM64 Linux with Docker, fronted by Tailscale Funnel for stable HTTPS without a public IP; wrote a seven-phase runbook that let another engineer reproduce it unaided.

Browser Automation & QA Harness Python · Playwright · Model Context Protocol

- Converted a manual regression checklist into repeatable Playwright scripts across mobile, tablet and desktop breakpoints, exposed to AI agents over Model Context Protocol.

Agent Factory Prep — progressive MCQ learning app HTML · JavaScript · Tailwind CSS · Vercel · Feb 2026 [live app](#)

- Built and deployed a topic-by-topic practice tool covering 39 topics across three chapters, with per-topic scoring, answer explanations and a progress dashboard.

EDUCATION

Agentic AI & Robotics Engineering — Panaversity / PIAIC, Batch 83 In progress · expected May 2027

MSc Economics & Finance — International Islamic University Islamabad Distinction · CGPA 3.92 / 4.00

Bachelor of Education — Allama Iqbal Open University

CERTIFICATIONS

OpenClaw with General Agents (Jul 2026) · Agent Factory Fundamentals: Building Digital FTEs (Jan 2026) · General Agents Fundamentals Part 1 (Feb 2026)

Three proctored exams passed — verify at panaversity.org/p/maleehabilalmb_x29ccl

LANGUAGES

English — full professional proficiency (IELTS 7.0) · Urdu — native · Mandarin Chinese — elementary
